OUR MISSION

This community exists because the industry wasn't built for us. *We're changing it from within.*

The number of women leading, building, and investing in financial services has grown — but the structural barriers, missing connections, and rooms women still aren't in haven't disappeared on their own. NYC Fintech Women exists because women in this industry deserve a community built specifically for them — not an afterthought or a diversity initiative. A substantive network where careers get accelerated and ambitions get taken seriously.

If you're ready to build your real career in a real community with likeminded women, this is where you start.

MEET THE TEAM

The people *behind the work.*

NYC Fintech Women runs on people who care. Every event, every recognition, every connection made through this community exists because a group of women in fintech decided to give their time, energy, and expertise to make this industry better than they found it.
